

Privacy, Safety and Style are seamlessly combined with Screenline's fence extension kits. Providing an easy DIY solution to boundary fences to create a **"fence with a difference"**

Screenline Slat Extensions are Pool Safety AS 1926.1* Compliant – all horizontal gaps are less than 10mm and when installed correctly will not provide a foothold for climbing. Achieving and maintaining the required Non-Climbable Zone (NCZ) is often a challenge. Screenline's slat fence extension kit has made this a breeze, whilst adding a modern stylish look to your prize investment.

Have you often wondered how you can increase privacy to your pool or spa? Check out our modern, practical and elegant solution today and increase your fence height by 300mm or 600mm!

Contact our team today on (02) 6057 7690 or visit www.screenlinefenceextensions.com.au

What does NCZ mean?

Non-Climbable Zone is a Pool Safety Term, it is a requirement that there is to be nothing to climb on within a 900mm Radius of the top of the fence. Therefore extending this height gives you an increased scope for plants, landscaping options and garden furniture around your pool fence.

*AS 1926.1 - It should be noted that the provisions of this Standard relate to barriers that are intended to be child resistant but not childproof, as effectiveness of the barrier is very much dependent on its location, installation and maintenance. Always check with your local authority.
